

- 1. Are there any twice-exceptional students in the class? Do any of the children also participate in HH's gifted program? What is the total number of girls and boys currently in 4th grade?**

There is 1 twice-exceptional student in the Math Academy and 5 of the students are in the Gifted program. The gender composition for grade 4 is 361 males and 356 females (50.3%/49.7%).

- 2. If the grade 4 Math Academy position was reduced and the funds put into maintenance projects what would be the priorities?**

Reducing one FTE would reduce the salary and benefits budget by a total of \$94,532. Those funds would be used for the following - \$68,000 for the Fairfield Ludlowe press box lift, \$25,000 for sidewalks in the courtyard at Dwight, and \$1,532 added to snow plowing.
