Subject: 2022- 2023 Fiscal Year- Q2 Financial Report

Attached you will find the Q2 FY2022-2023 financial report. The attached documents include a summary by major classification of projected and unencumbered balances (page 2), a detail summary by major classifications (pages 3-6), and additional detail financials (pages 7-9).

Overall, we propose to initiate transfers from balances in personnel and transportation to cover critical needs in maintenance, as part of our IT Five-year refresh, in legal services and to initiate the training and materials purchases necessary for our literacy program. This enabled us to lower our budget request for these critical items in FY23-24.

The 2022-2023 fiscal year began with a full budgeted headcount and projected need for busing for all students based on historical trends. However, we continue to experience personnel vacancies and associated fringe benefit savings and the driver and staffing shortage that resulted in a lower number of bus runs.

Personnel Services

Following the trend in the summary document, you will see that we had hoped that we would be able to fill all vacancies at rates like in the past (with our historical budgeted attrition) and as we begin the year, the attrition and vacancies continue to be greater than anticipated, as well as greater than prior year trends. The Q2 vacancies are slightly higher than projected in Q1. The gap increased in substitutes as we were able to fill at a higher rate than initially projected in Q1. As you are aware, and can see in the fixed charge line item, this also resulted in savings in health care and other benefit costs. We anticipate the need to monitor this closely in the current year and plan to report monthly vacancies and associated projected staffing costs to the board.

Fixed Charges

Health insurance follows the trend for personnel, as we see larger than anticipated vacancies and longer than projected time to hire, we also experience a balance in the insurances. The budget assumed approximately 20

more individuals than are currently enrolled in health insurance. The projection assumption is that we'd continue at that rate for the remainder of the year, except for an increase of net four for the remainder of the year starting in January. As the experience varies, we will update the projection. This is monitored monthly and will be reported each quarter. With the current vacancies the projected balance is \$575,000.

Pupil Personnel Expenses

All special education costs are included in this category except for salaries and capital. The projection includes all anticipated outplacement costs and settlement agreements, related service needs, and the projected corresponding revenues - Medicaid, Excess Cost, and IDEA funds. The excess cost reimbursement is reflected in the projection, at a 70% reimbursement for those eligible expenses that are "in excess" of four times the average per pupil expenditure. The Medicaid, IDEA and tuition reimbursements are reflected in the projected balances. The Pupil Personnel expense balance nets to \$992,617. This is the result of three main factors: (1) a surplus in transportation, the result of a driver shortage. The transportation projection has an assumption of busing at the current number of buses and runs but adding two six-hour buses as of January 1, 2022. We will continue to closely monitor and report out on the busing services, (2) lower than projected costs for OT, PT and Speech services, and (3) tuition as projected, including an assumption of additional outplacements in the current year.

School Expenses

These expenditures support instruction and activities at the building level and include supplies, materials, textbooks, copying, sports and other activities.

Support Expenses

The need reflects proposed transfers to support legal services, exceeding the budget due to Title IX requirements and special education legal support. In addition, we need to support the initiation of the Right to Read legislation, including \$335 thousand for components of the program and \$94 thousand for unit writing. We anticipate a September 2024 implementation and reduced the budget request for the upcoming year to reflect this timeline.

Maintenance/Operation/Transportation

\$4 million is budgeted in this category for utilities, but we typically hold this flat until we receive the first winter heating bills. Electric and heating generation rates were budgeted at contractual rates for the entire fiscal year. However, the contract for heating and electric was discontinued in January and the distribution and transportation charges for these utilities are not contracted and remain variable as is usage. This will be updated in the Q3 report. The remaining accounts are anticipated to spend the full budgeted amount, except for a balance in plumbing and heating supplies and transportation, as mentioned earlier. The maintenance service accounts reflect proposed transfers to cover critical projects including HVAC, the Tomlinson Chiller project, the FLHS scoreboard, tree trimming and irrigation repairs, security updates for window coverings, asbestos abatement of a staff facility, radon remediation and technical consulting.

Capital

The largest portion of the capital budget is for technology equipment, and almost 78% of that budget has been expended. There is an additional \$200,000 budgeted for school and department equipment replacement, whose expenditures are need based and mainly purchased in the Spring. Finally, the proposed transfers reflect the need for Chromebook, server, and interactive board replacements as per the five-year waterfall/equipment refresh cycle.
