### HEALTH ASSESSMENTS AND IMMUNIZATIONS

5141.3(a)

- I. In accordance with Connecticut General statutes, each student enrolled in the Fairfield schools shall be required to have a health assessment by a legally qualified practitioner of medicine (physician or osteopath licensed to practice in the United States), or by an advanced practice registered nurse, registered nurse, or Physician Assistant licensed to practice in Connecticut.
- prior to initial entrance into preschool programs,
  - prior to initial entrance into kindergarten,
  - for transfer students, prior to initial entrance into the Fairfield schools
  - in grades 6 and 9
  - for ungraded students, prior to initial entrance and whenever a health assessment is required for students of the same age cohort as the ungraded student.

All health assessments required above shall include documentation of an assessment of the student's risk of exposure to tuberculosis. Any student determined to be at high risk shall receive a Mantoux tuberculin skin test performed in the United States as part of the required health assessment.

Health assessments required prior to initial entrance into a Fairfield school shall include evidence of a Mantoux tuberculin skin test performed after most recent entry into the United States for students entering school in Fairfield from a country with a high prevalence of tuberculosis.

Countries with a high prevalence of tuberculosis include those identified as such by the Connecticut Department of Public Health. Refer to corresponding Administrative Regulations.

Any student found to have a positive Mantoux tuberculin skin test or tuberculosis disease shall be permitted to attend school only in accordance with the tuberculosis control protocols established by the Fairfield Director of Health and School Medical Advisor.

Any student not in accordance with this policy shall not be permitted to register for or continue attendance in school.

All students are encouraged to have their health assessments done by their private health care provider to promote continuity of care. However, if this is not done, health assessments will be available in the schools or in the Fairfield Well Child Clinic for eligible students with parent authorization.

Students who are experiencing health problems or are suspected of having a health problem may be referred to their private health care provider for a health assessment at other than required times.

### **HEALTH ASSESSMENTS AND IMMUNIZATIONS** (continued)

**5141.3(b)**

- II. Students in high schools participating in interscholastic sports (tryouts, practice and play) will be required to have a health assessment by their private health care provider within one calendar year prior to start of participation in the sport for the current school year. Students who do not have evidence of the health assessment within the calendar year cannot participate in the sport. Students participating in high school interscholastic sports (tryouts, practice, or play) shall be required to have a health assessment no more than thirteen months prior to participation in the sport for the current school year. The health assessment is valid for a period of thirteen months from the date it was done. Once the health assessment becomes more than thirteen-months old, the student cannot continue to participate in the sport until a new health assessment is done and submitted to the school. The health assessment must be done by a legally qualified practitioner of medicine (physician or osteopath licensed to practice in the United States), or by an advanced practice registered nurse, registered nurse, or Physician Assistant licensed to practice in Connecticut.
- III. Timing of health assessments shall be in accordance with the corresponding Administrative Regulations.
- IV. In accordance with Connecticut General Statutes, the Board of Education shall require students to be protected by adequate immunizations against diphtheria, pertussis, tetanus, poliomyelitis, measles, mumps, rubella, hemophilus influenza type b, hepatitis B, chicken pox (varicella), pneumococcal, hepatitis A, influenza, meningococcal (unless medically contraindicated or if the student meets the conditions for a Religious Exemption below.)
- V. Parents or guardians have the right to opt their child out of any non-emergency, invasive physical examination or screening that is required and administered by the school, as a condition of attendance, which is not necessary to protect the immediate health or safety of the student or other students, and not otherwise permitted or required by the state law.

The term “invasive physical examination” means any medical examination that involves the exposure of private body parts, or any act during such examination that includes incision, insertion, or injection into the body, but does not include a hearing, vision, or scoliosis screening.

### HEALTH ASSESSMENTS AND IMMUNIZATIONS (continued)

5141.3(c)

Parents/guardians wanting their children excused from immunizations on religious grounds may do so by meeting both of the following conditions:

- a. Must have been enrolled in school in Grades K-12 on or before midnight on April 28, 2021; and
- b. must have submitted a valid religious exemption by midnight, April, 27, 2021 in writing to the Superintendent of Schools if such immunization is contrary to the religious beliefs of the child or of the parent/guardian of the child. The request must have been officially acknowledged by a notary public or a judge, a clerk or deputy clerk of a court having a seal, a town clerk, a justice of the peace, or a Connecticut-licensed attorney.

The law does allow for a Religious Exemption to follow a student who transfers schools provided that they were enrolled in a Connecticut school on or before April 28, 2021 and had a valid exemption in file by midnight, April 27, 2021.

It is the responsibility of the Principal to ensure that each student enrolled has been adequately immunized and has fulfilled the required health assessments. The school nurse shall check and document immunizations and health assessments on all students enrolling in school and to report the status to the school principal. The school nurse shall also contact parents or guardians to make them aware if immunizations and/or health assessments are insufficient or not up-to-date. The school nurse will maintain in good order the immunization and health assessment records of each student enrolled.
