LIBRARY MEDIA CENTERS

6163.1

Library Media Centers shall be made available to all students.

Library Materials Selection

The Board of Education delegates authority for the selection of library media materials through the Superintendent of Schools, to the building principals, and then to the library media specialists for those materials housed in the Library Media Centers at the building level and to the Superintendent or designee and the Library / Media Coordinator for those materials selected for distribution on the system level. The word material, as used in this policy statement, includes books, periodicals, pamphlets, pictures, films, videos, computer software, audio recordings, and all other materials, print and non-print, which are used by the students and faculties of the Fairfield Public Schools and stored within the school facilities.
